

Seeing Double

*26 inch table topper design
created in the 5x7 hoop!*

Time for some multi-tasking here! This design set allows you to create a cheery, elegant, festive... whatever-styles-you-choose reversible table topper to complement the occasion and your decor! The topper measures 26 inches in diameter when complete. Now I know your hoop isn't that big, but you will embroider each piece and attach the previous piece in the hoop until the entire outer ring is complete. You will then sew in the center, embroider the center motif,

and your topper will be finished just as if you had a 26-inch hoop! For the sample, we chose soft green tones for one side and brighter yellow and brown tones for the other side.

But your combinations are endless! How about a Christmas and winter or Valentine and St. Patrick or Halloween and autumn combo? You may just find yourself making several toppers to take you through all the seasons of the year! Whatever your choices, I hope you enjoy the set, but be prepared for those requests when your friends see your topper!

7 multi-format design files
and 21 page how-to
tutorial designed for 205
mm or longer and 150 mm
or wider hoops.

Seeing Double

Create this reversible table topper in your hoop! The “wings” are constructed and attached in the hoop, as well as the center motif, and the final center circle is sewn in place.
